

Does your child need support?

Can KIDS help you?

We offer flexible 1:1 support for disabled children and young people aged 5-17 years.

The support depends on what the young person needs and wants.

It includes help with daily activities such as eating and getting ready for outings; help with going out and about; support for leisure activities; trying out new things; spending time at home; communicating and learning from one another; or help with independent living skills. Our aim is to help all young people enjoy ordinary activities and do all the things non-disabled children take for granted.

Our support workers are given training and supervision. We will help with matching, but families will have the final say in appointing their support worker.

We also offer advice around direct payments and Individual Budgets, and we work in partnership with the Youth Hostel Association.

To find out more, please contact Gabriella Everitt on 0114 2230236 or email gabriella.everitt@kids.org.uk
